

ENDPOINT SECURITY AS A SERVICE

The dilemma

In the face of cyber threats that constantly shape shift and rapidly multiply, a diversity of endpoint systems and the fact that some systems often sit outside network defenses, cybersecurity has become more complicated than ever before.

Endpoint security is no longer just about antivirus. Instead it is a combination of sophisticated security controls that work together to deliver all aspects of endpoint threat mitigation.

A comprehensive, well-coordinated, endpoint security strategy is a key foundational control to endure organisational protection and minimise risk exposure.

Rethinking the way we do IT to solve business dilemmas.

By reinventing cybersecurity, we can give your business the right skills at the right time. Benefit from our extensive expertise and specialist skills without bringing them in-house full time with Managed Endpoint Security as a Service from Aptronics.

Endpoint Security as a Service

Powered by Symantec Endpoint Protection (SEP), this service delivers superior multilayer protection for your endpoint devices against cyber hazards that threaten the confidentiality, integrity and availability of business assets, all through a centrally managed console.

Thick the right boxes

- Integrates easily with existing security infrastructure.
- Provides orchestrated responses to quickly address threats
- Single, lightweight Aptronics hosted agent for a central touchpoint
- High security performance without sacrificing end-user productivity

Aptronics Hosted Symantec Endpoint Protection Cloud

We'll take care of the day-to-day business of endpoint security, so your organisation can focus on driving theirs. Our managed service will:

Simplify the process of onboarding, managing and protecting users on any endpoint

Access to a team of security professionals to enroll devices and protect corporate environment

Maintain a proactive security stance with the ability to detect and prevent advanced threats and mutating malware, regardless of their endpoint attack

Reduce the company's exploitable attack surface to the smallest possible footprint, which reduces business, technical and operational risk.

Providing reporting, health checks, incident management and security maintenance.

Get everything you need to pay for nothing you don't. Speak to one of our consultants today to see how easy our Managed Endpoint Security as a Service offering can make it to shield your digital assets from cyber harm.

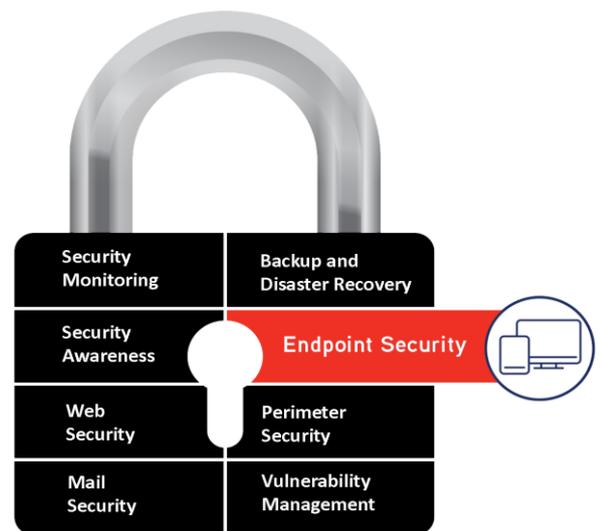

Not only we can assist you with your Endpoint Security requirements, but we reinvented cybersecurity so your business can benefit from straight forward protection.

8 security services ensure your organisation is 90% covered. And we can help take care of the rest too.

Trust out team of security experts. Protecting, monitoring, responding to cyber threats. Predefined. Pre-packaged, Cost Effective. Cloud based security solutions mitigate 90% of risk immediately.

Our end-to-end Cybersecurity Model takes care of all your risks.

Speak to an Aptronics consultant today to discover how our Endpoint Security as a Service can reduce costs, reduce risk and improve the compliance status of your organisation.

8 security services
= 90% covered
